

GERPAAS[®]

SOLAR SYSTEM

Solar Energy Mounting Systems

GERPAAS offers engineering and supply of photovoltaic solar system components to our respective clientele globally.

As a manufacturer of metallic mechanical support systems GERPAAS introduces the new Solar Support Systems for all project requirements.

Based on the customer and project needs we offer a wide range of component categories of mounting system options.

Main 4 different solutions offered are;

- .Single Foundation Mounting System
- .Double Foundation Mounting System
- .Roof Type Mounting System
- .Dual Glass Solar Panel Mounting System.

Single Foundation Mounting System

solar system

.Single foundation.
.Open area application ease.

Adjustable foundation, girder and strut.

.Connected purlins.

.Practical purlin and girder connection.
.Optional earthquake diagonal

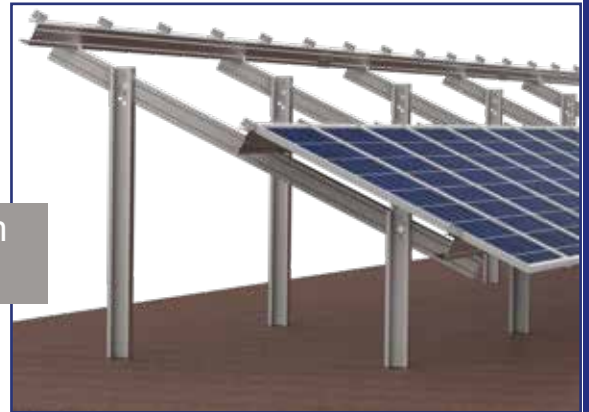

Double Foundation Mounting System

.Double foundation.
.Open area application ease.

Foundations with slots for maximum application tolerance.

.Connected purlins.

.Practical purlin and girder connection.
.Optional earthquake diagonal

Mounting System Compatible with the Dual Glass Solar Panel

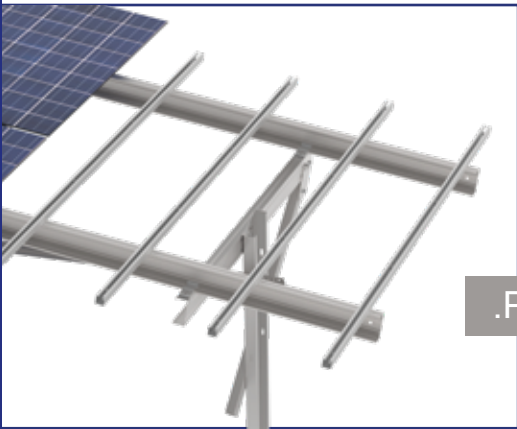

solar system

.Single foundation.
.Open area application ease.

.Adjustable foundation, girder and strut.

.Practical purlin and girder connection

.Rafter connection fully compatible
with the dual glass solar panel.

Roof Mounting System

.Application ease

.Roof and panel mounting with the c-plus mounting profiles.

.Profile mounting to roof with drilling screw.

.Profile mounting to clamps with cage nut.
